SUMMARY

Senior Software Engineer with 6+ years building real-time, data-intensive web applications for enterprise, government, and international clients with Angular, React, Node.js/NestJS, and TypeScript. Proven record of optimizing performance (up to 80%), building secure role-based systems, and shipping production software in Agile teams across time zones.

TECHNICAL SKILLS

Frontend: Angular, React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Ionic, ElectronJS

Backend: Node.js, NestJS, Express.js, REST APIs, Socket.IO (real-time), Firebase, RBAC

Data: PostgreSQL, MySQL, MS SQL, MongoDB, SQLite, Power BI, AM4Charts, Google Maps APIs, Leaflet

Testing & Tools: Jest, Vitest, Playwright, Git, Docker, AWS, CI/CD, Jira, Agile/Scrum

PROFESSIONAL EXPERIENCE

Application Designer / Full Stack Developer — LMKR *Islamabad, Pakistan · May 2022 – Present*

- Built OpenPort's logistics marketplace — load posting, real-time bidding, and live GPS fleet tracking via Google Maps APIs — powering 800,000+ shipments, 5M+ tons of freight moved, and 500M+ km of tracked travel.
- Developed a management portal with role-based access control (RBAC) and fleet/team management modules.
- Mentored junior developers on Angular, Node.js, and team coding practices.
- Built property listings, advanced search, and map-based visualization for a real estate platform.
- Built the central auth service (gRPC) and admin portal for PLRA's land-records platform: logins, OTP, RBAC.

Tech: Angular, Node.js, Express.js, TypeScript, PostgreSQL, MySQL, MS SQL, gRPC, Google Maps API, Power BI, AWS

Frontend Developer — New Effect *London, UK (Remote, Part-time) · Aug 2023 – Present*

- Designed and built core forecasting modules in Angular + TypeScript for a financial planning platform.
- Re-engineered calculation engines for 80% faster performance and fewer forecasting errors.
- Kept data-heavy views responsive with lazy loading, Web Workers, virtual scrolling, trackBy, and caching.
- Built interactive analytical dashboards using AM4Charts.

Tech: Angular, TypeScript, AM4Charts, Bootstrap

Full Stack Developer — TeleTaleem *Islamabad, Pakistan · Sep 2021 – May 2022*

- Built features for a KPK Government tax-revenue collection system, improving collection workflows.
- Implemented RBAC, Firebase Storage, and Firebase Cloud Messaging for real-time notifications.
- Developed an offline-capable desktop application with ElectronJS + SQLite3.

Tech: Angular, Node.js, Firebase, ElectronJS, SQLite3

Full Stack / MEAN Developer — New Vision Technologies & Abacus Multimedia *Pakistan · 2019 – 2021*

- Turned static UIs into dynamic Angular apps backed by Node.js REST APIs and SQL/NoSQL databases.
- Built cross-platform mobile apps with Ionic and integrated Stripe, PayPal, and Braintree payments.
- Implemented real-time features with Socket.IO and map integrations, deployed with Docker on AWS.

Tech: Angular, Node.js, Ionic, MongoDB, MySQL, Socket.IO, Docker, AWS

PROJECTS

SkyTrace — Live Flight Tracking (open source) github.com/MShahbaz135/skytrace

- NestJS + Socket.IO stream live flights to a React/Leaflet canvas map, tested with Jest and Vitest.
- One shared, credit-aware poller keeps any number of viewers within a 4,000-credit/day API budget.

EDUCATION

BS Software Engineering — National University of Modern Languages (NUML), Islamabad · 2016 – 2020
